

Statement for RoHS II Directive (2011/65/EU) or the German Restriction of Hazardous Substances Ordinance

The European RoHS II Directive (2011/65/EU) and the Delegated Directive (2015/863) amending Annex II of the RoHS II Directive serve to restrict the use of certain hazardous substances in electrical and electronic equipment (EEE). The RoHS Directive is nationally implemented in Germany in the form of the Restriction of Hazardous Substances Ordinance (ElektroStoffV). This legislation governs the maximum concentrations of certain substances in order to protect the environment and human health.

OTT-JAKOB Spanntechnik GmbH is a manufacturer as defined in the aforementioned directive and hereby confirms that all of our electrical and electronic products conform to RoHS II and have been designed and manufactured in accordance with Article 4 of Directive 2011/65/EU.

Electrical and electronic equipment that can be assigned to one of the categories specified in the RoHS II Directive and to which no exception applies have been given a CE marking in accordance with the RoHS II Directive 2011/65/EU.

Furthermore, we can guarantee that all of our electrical and electronic equipment to which exceptions do apply also meets the legal requirements set out in the RoHS II Directive. For legal reasons, however, this equipment has not been given a CE marking.

As we take product safety and our reliability as a supplier very seriously, we have implemented several measures to support these efforts, including:

- Using trustworthy sources or distributors who confirm and observe substance bans and their declaration obligations in accordance with the RoHS II Directive
- Performing cyclical inspections to ensure the observance of substance restrictions, substance bans and declaration obligations
- Performing random spot checks
- Observing quality assurance measures where irregularities are identified

OTT-JAKOB Spanntechnik is aware of the amendments and relevant validity data set out in the Delegated Directive (2015/863). Our electrical and electronic products are assigned to the 'Industrial monitoring and control instruments' category. We will ensure compliance with the Delegated Directive until 22 July 2021 accordingly.

OTT-JAKOB Spanntechnik GmbH also constantly monitors all legislative amendments concerning the RoHS II Directive, the CE marking and the discontinuation of exceptions and implements these changes accordingly.

This statement refers exclusively to the product delivered by us. No extension of the legal or contractual warranty is connected to this statement.
